PARTS SHIPPING GUIDE

1 **Locate a box that is slightly bigger than your item in every dimension**

- 3-5" should suffice. More for heavier items.

2 **Wrap your item fairly tightly with bubble wrap and tape secure from the center and both ends**

- 2 layers at a minimum, but add more if your item has sharp corners or is extra fragile
- You can also use bubble wrap to pad areas that might be prone to breaking off before wrapping the entire bundle

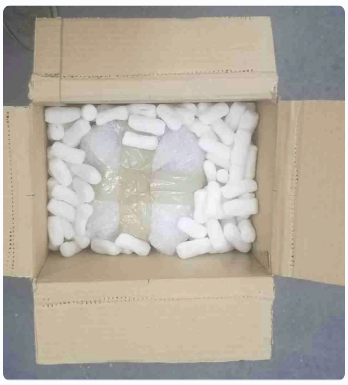

3 **Create a bed of paper or other material in the bottom of the box for your item to rest on**

4 **Set your item on the bedding, then fill around it with paper, packing peanuts or other material that can be used to take up the space around the item**

- It should be not too tight, not too loose (so the item doesn't move)

5 **Fill the top of the box with paper or other material the same as the bottom bedding, then seal the box with tape, preferably covering all open slits to keep out debris and add strength.**

Ship To:

Mr Heaterbox and Interior
4126 Henderson Rd
Harrowsmith, ON
K0H 1V0 Canada
(613) 532-2587
MrHeaterbox@KOS.net
